KARIMA ED DAHHAK

+212 771 493 177 | karima.eddahhak@eidia.ueuromed.org | LinkedIn | GitHub | Fes, Morocco
Engineering Student – Cybersecurity & AI Systems

Profile

Engineering student at UEMF with a foundation in **cybersecurity**, **AI-driven systems**, and **data analysis**. Experienced in multidisciplinary projects combining **machine learning** and **real-time systems**. Interested in AI, autonomous systems, and cybersecurity, with strong motivation for international research-driven environments.

Education

Engineering Degree in Cybersecurity *2025 – Expected 2028*
Euro-Mediterranean University of Fes (UEMF) – Fes, Morocco

Preparatory Classes in Digital Engineering *2023 – 2025*
Euro-Mediterranean University of Fes (UEMF) – Fes, Morocco

Experience

AI & Cybersecurity Engineering Intern – Direction Générale des Impôts (DGI), Rabat *August 2026*

- Built an end-to-end **public procurement analysis pipeline**: web scraping, **PDF/OCR**, **PySpark**, **PostgreSQL**
- Detected unusual procurement patterns for **tax-risk assessment** with **Isolation Forest** and **SHAP**
- Exposed results through a **FastAPI** service and a deployed **Streamlit** dashboard

Offensive Security Intern – 1337 Khouribga *Summer 2026*

- Built and attacked an **Active Directory** lab (**Windows Server**, **Kali**): **Kerberoasting** attack chain + writeup
- Developed **Damn Vulnerable RAG**, a deliberately vulnerable RAG assistant (**Ollama**, **ChromaDB**, **Streamlit**) to study **prompt injection** attacks and defenses
- Analyzed network traffic with **Wireshark** and wrote supporting tooling in **Python**

CTF Competitions

CSAW'26 CTF (NYU) – **Qualified for the in-person MENA Finals** (12–14 November 2026) *Team 0xUEMF*
HTB Cyber Apocalypse 2026 – Ranked **66th of 6,744 teams**, **136/136 challenges** solved *Team 0xUEMF*
Securinets CTF 2026 – **Qualified for the Finals** (Tunis, 12–13 Dec 2026) – #7 MENA *Team 0xUEMF*

Projects

NOOD – AI-Powered Public Speaking Coach *Hack'Days Hackathon (UEMF)*

- Developed **multi-modal AI system** analyzing speech, body language, and content using **Python** (**MediaPipe**, **SpeechBrain**, **Librosa**)
- Built cross-platform desktop application using **Electron**, **React**, and **TypeScript**
- Designed scoring system combining voice (40%), body language (30%), and content analysis (30%)

Satellite Cybersecurity System *ACT IN SPACE International Hackathon*

- Designed **real-time satellite threat detection** system using **Machine Learning** models (**Isolation Forest**, **LSTM Autoencoder**)
- Simulated cyberattacks including **GPS spoofing**, **DoS**, and **signal jamming**
- Built monitoring dashboard using **React**, **Three.js**, and **Docker** for autonomous threat detection

Skills

Programming: Python, C/C++, SQL
AI & Machine Learning: Hugging Face, LLMs, RAG, prompt engineering, basic fine-tuning
Cybersecurity: Offensive security fundamentals, network scanning, attack simulation
Systems & Tools: Linux CLI, Git, Docker, Virtual Machines
Languages: Arabic (Native), French (B2), English (B2)

Certifications & Training

AWS Cloud Practitioner Essentials – Amazon Web Services (AWS) *April 2026*

Extracurricular Activities

SparkSec Cybersecurity Club – Member: cybersecurity workshops and hands-on labs *2024 – Present*
Rotaract Club – Member: community service projects, leadership development *2023 – Present*
Jeunes Bénévoles Association – Volunteer: social initiatives and community support *2023 – Present*
